PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer with 6+ years of experience designing, developing, testing, and maintaining scalable and client-facing web applications. Skilled in React.js, TypeScript, and modern frontend stacks, with a deep understanding of software development life cycle (SDLC). Adept at translating client requirements into functional software designs, performing root cause analysis, and ensuring quality code through test automation and peer reviews. Strong communicator with proven experience in stakeholder coordination, documentation, and continuous learning to keep pace with modern development practices.

EXPERIENCE

Infosys

Pune

Technology Lead (Client: Danske Bank)

November 2022 - Present

- Analyzed client requirements and collaborated with system analysts to design maintainable software modules using React and Redux.
- Implemented and optimized key components of enterprise platforms with a focus on data flow, usability, and system performance.
- Participated in root cause analysis for critical production issues and proposed long-term fixes for recurring patterns.
- Designed and executed unit, integration, and UI tests, validating all modules before deployment using Jest and React Testing Library.
- Maintained clear and structured technical documentation including impact assessments and flow diagrams in Confluence.
- Communicated with stakeholders regularly to align project status, capture clarifications, and ensure on-time deliveries.
- Raised and tracked code changes through Git workflows with clear descriptions, rollback plans, and replication steps.
- Collaborated daily with cross-functional teams in Agile ceremonies and documented sprint progress and blockers.

Google Operations Center

Hyderabad

Digital Media Senior Associate

March 2022 - November 2022

- Worked with design and functional teams to understand requirements and implement creative, data-driven web interfaces.
- Automated test workflows and identified usability bugs, reducing manual testing cycles and improving UI reliability.
- Coordinated with stakeholders for bug triaging, documentation updates, and implementation summaries.

Amazon Development Center India

Pune

Technical Support Associate

September 2019 - March 2022

- Analyzed frontend support cases and performed root cause debugging for user-reported UI issues.
- Documented process improvement ideas and change logs for tool updates and feature enhancements.
- Collaborated with developers and testers to ensure stable releases, validating modules against client expectations.

TECHNICAL SKILLS

Languages & Frameworks:	JavaScript (ES6+), React.js, TypeScript, HTML5, CSS3, JSON, Redux Toolkit
UI & Styling:	Styled Components, CSS Modules, Material UI, Tailwind CSS, Bootstrap
State Management:	Redux, React Query, React Hook Form
Testing:	Jest, React Testing Library
API Integration:	REST APIs, GraphQL (Apollo), Axios, Fetch, Async/Await
DevOps & Tooling:	Git, Azure DevOps, Docker, npm, Yarn, Webpack, Babel, Vite
Agile Practices:	Jira, Confluence, Task tracking

EDUCATION

University of Pune | Full-time

Bachelor of Electronic and Telecommunication Engineering
